

Hungarian

Higher Education

2010/2011

Hungarian Rectors' Conference

Dear Reader,

Although I know I should be modest, I take pride presenting this booklet to you. I am proud to submit to you a short description of the Hungarian higher education which can look back to a centuries-old history, but at the same time I am aware that this thin booklet can only give you a very sketchy account of the system of Hungarian universities and colleges.

On the following pages you will find not only the 69 higher education institutions (HEIs) located in Hungary but the names of 4 more Hungarian HEIs beyond our frontiers. The list gives you the picture of a diversified system of HEIs: it consists of state-owned universities and colleges, HEIs owned by religious denominations, foundations or even private organisations. The history of each HEI might also be of interest, some of them are several centuries old, and some others are new. Like in

most other countries, in Hungary, too there are a few small HEIs that meet highly specific needs and large universities and colleges with thousands of students and hundreds of staff. Each HEI has its own special important function in the complex system of the Hungarian higher education. Another characteristic that all HEIs share in common is that they have a double function; on the one hand they are in charge of training students in highly special fields, on the other hand they are the centres of knowledge and culture, and the workshops of research. Besides preserving national traditions, Hungarian HEIs are part of the European system of higher education, and develop and maintain relations with a large number of HEIs all over the world.

Since this booklet can only give a brief description of the Hungarian system of higher education, I suggest that you search the website of the Hungarian Rectors' conference (www.mrk.hu) for further information which will give you more details about our universities and colleges.

Éva Sándor-Kriszt
President of the Hungarian Rectors' Conference

Hungarian Rectors' Conference

The Hungarian Rectors' Conference (HRC) is a body to represent the whole Hungarian higher education institution system. Its members are the rectors of universities and colleges. The system of Hungarian higher education is very diverse as it comprises state, church, private and foundation higher education institutions which all are represented both in Hungary and abroad by HRC as a public corporation. The conditions of operation of HRC are provided by higher education institutions.

HRC is, by virtue of law, a public benefit organisation with special legal status to perform also public duties set out in the Act on Higher Education in connection with its members and to the activities and duties of its members.

HRC is an independent public corporation entitled to represent higher education institutions and to protect their interests. HRC may deliver an opinion on any issue with relevance to the operation of the higher education system and may make proposals for decision-makers or those in charge of preparing decisions. The Statutes include the regulation of operation and a four-level system of organization of HRC. The supreme decision-making organization of HRC is the Plenary Session, comprising all of the rectors of the Hungarian higher education institutions (69). Universities and colleges are represented by a specific University Section and a College Section. Operative decision-making and implementation duties are fulfilled by the Presidency with eleven members. Special professional issues are discussed by eighteen committees with powers of decision-preparation.

The bodies of HRC are supported by the Secretariat headed by the Secretary General.

The means available to HRC are specified by the Act on Higher Education and other legal regulations. Interest representation can mainly be exercised by HRC's right of assent in most significant issues of the regulation of higher education.

Legal regulations provide also another means for interest representation, allowing the representatives delegated by HRC to take part in the activities of other higher education bodies and organizations. HRC delegates members to the Hungarian Accreditation Committee of Higher Education, to the Higher Education and Scientific Council, to the Hungarian Scholarship Board, to the Language Examination Accreditation Board and to other organizations active in the field of higher education and research.

HRC is member of the European University Association and the International Association of Universities.

Faculties, institutes

College of Commerce, Catering and Tourism, College of International Management and Business Studies, College of Finance and Accountancy (The latter College has an institution in Zalaegerszeg and one in Salgótarján)

Short introduction

The mission of the Budapest Business School, which strives to become a leading higher educational institution in Hungary and in Central Europe, is to train students who, on completion of their studies, will have a wide knowledge of the theory and practice of business. Our graduates will be able to fill positions in businesses, local and government administration.

Scientific research, international relations, projects

The professors and the teaching staff of BBS consist of highly qualified specialists in their respective fields of study. BBS has extensive connections with various local business organizations and professional bodies, as well as collaborative lines with a number of universities and professional organizations abroad. This is proven by the large number of domestic and international research and teaching material development projects in which BBS is a partner. BBS is also an active participant in the ERASMUS mobility programme.

Óbuda University

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional), PhD programs, Master's level further specialization, Higher level vocational training, Adult training and education

Bánki Donát Faculty of Mechanical & Safety Engineering, Kandó Kálmán Faculty of Electrical Engineering, Keleti Károly Faculty of Economics, John von Neumann Faculty of Informatics, Rejtő Sándor Faculty of Light Industry and Environment Protection, Trefort Ágoston Centre for Engineering Education, Alba Regia University Centre -Székesfehérvár

Doctoral programs

Applied Informatics Doctoral School

Short introduction

The Óbuda University – as the legal successor of Budapest Tech established on January 1, 2010 – bases its policy on both nourishing traditions and pursuing a development-oriented agenda. The University has implemented the ISO 9001:2008 quality management standards, and as a major player in higher education it offers competitive and quality services. The University, awarded with the Higher-education Quality Prize, fulfills its mission through knowledge transfer, modernization and innovation.

Scientific research, international relations, projects

Research, development and innovation are the three most important cornerstones of our institution that can benefit a lot from the University's valued educational background. Research activities on campus span a large spectrum, like peer-reviewed basic research, European and national research projects and industry-oriented developments and innovations. Besides the „Transportation Informatics and Telematics University Knowledge Center” and „Robot Technology.

Scientific research, international relations, projects

The BME is proud of its more than 225-year tradition of excellence in engineering education. It has developed into the largest institutions of higher education in Hungary and it is one of Central-Europe's most important research centers. Her results in the EU 6. R+D Framework Program proves, that BME was in fact the most successful participant of the Framework Program, not just in Hungary but also among the 10 new member state participants. The University considers scientific and applied research and development of equal importance not only to its educational activities, but also to economic and social development. BME has 7 knowledge centers and is the member of the most respected European and worldwide communities for higher education and engineering, such as EUA, CESAER, SEFI, IAUP, INU.

Scientific research, international relations, projects

The CUB is one of Hungary's leading universities. The degree courses and faculties of our University are some of the most popular in the country. Our Management Programme is within the Financial Times Top 50 Ranking. The University received the Higher Education Quality Price and the University of Excellence title in 2010. It has a wide range of partnerships in the Hungarian private sector, and the professor system sponsored by these partners is unique. The university is a leading player in the process of internationalisation with an extensive network of international partners. Our institution wishes to continue to strengthen its research activity in which it has already achieved major results.

Short introduction

As an independent institution, with the educational and infrastructural investments, the College became a student-friendly European Campus, intellectual and innovation centre of Dunaújváros and the region. The students' life is governed by the more than 250-year old Selmec's student traditions. First among the Hungarian state institutions of higher education, the College has been in possession of the ISO 9001:2000 quality management certificates since spring 2003.

Scientific research, international relations, projects

In 2006 the Dunaújváros Regional Knowledge Centre of Materials Science and Technology was established. Besides, the institute works on the following R&D and innovation research: mechanical engineering, mechatronics, environment protection and energy rationalising, informatics, educational technology, media sciences, social sciences, economics and management, logistics and applied linguistics. The College also participates in research projects and student-teacher mobility in the frame of Leonardo and Erasmus programmes and bilateral agreements. Due to the extensive international partnership the institution offers BSc courses in English for foreign students.

Faculties, institutes

Applied Economics and Rural Development, Arts and Humanities, Economics and Business, Child and Adult Education, Engineering, Dentistry, Health, Information Science, Law, Medicine, Music, Pharmacy, Public Health, Science and Technology, Faculty of Agricultural and Food Sciences and Environmental Management

Doctoral programs

Doctoral (PhD) studies are organized in 25 doctoral schools. The University awards doctoral degrees in 6 scientific areas (agriculture, engineering, humanities, medicine, sciences, and social sciences) and 25 different scientific branches. The annual number of doctorates is between 150 and 200.

Scientific research, international relations, projects

The R&D activity of the University gained international esteem in all scientific areas, with about 7-800 projects running parallel. Its R&D income represents 16-17 % of the total R&D income of Hungarian HEIs, and it increases year by year. Several projects have received international support, nearly 50 of them are financed by the EU framework programs. Two regional university-based knowledge centers operate, while the Hungarian Academy of Sciences supports 11 research groups at UD. The University has more than 300 bilateral agreements with universities abroad, and it is a member of several international organizations.

College of Nyíregyháza

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional), University degree (traditional), Master's level further specialization, Higher level vocational training, Adult training and education

Faculties, institutes

Faculty of Arts, Faculty of Economics and Social Studies, Faculty of Engineering and Agriculture, Faculty of Teacher Training, Faculty of Natural Sciences and Information Technology

Short introduction Building on past experience, its values and on the results of its developments, College of Nyíregyháza wants to become the higher education knowledge centre of the country and the North-East Region of Hungary. The College is aware of the social and economical situation in the region and so, it can fully contribute to the assurance of the human resource necessities of the knowledge-based economy, to the strengthening of the local innovative processes and through this, it can catch up with the more developed parts of the country.

Scientific research, international relations, projects

The strategy of the research and development is the realization of the targets determined in the Institutional Development Plan (IDP), which helps to increase the institution's academic program ("Equal Opportunities"), the North Great Plain Region's role ("Green Region") and the economical and innovative efficiency of the labour market ("Dynamic Network"). The College built a significant partner network. These partner institutions make possible to exchange the leadership and management experiences and also to extend the professional cooperation in the field of education and research.

Ferenc Rákóczi II. Transcarpathian Hungarian Institute

Type of programs and degrees

Bachelor's degree, SSc degree, Adult training and education

Short presentation

This institution is a state recognised Ukrainian higher education institution of accredited degree III founded and maintained by the Foundation for the Transcarpathian Hungarian College (FTHC). The Foundation was established by the Hungarian Cultural Association of Transcarpathia, the Transcarpathian Association of Hungarian Pedagogues, the Transcarpathian Reformed Church, and the Local Government of the Town of Beregovo (Beregszász). The institution has been operating as an independent, officially registered higher education institution with a state operating permit since 1996. Transcarpathian students may pursue studies in 6 departments, 10 programmes in the Institute. The institution has not yet been granted any support from the Ukrainian state. It is professionally controlled by the Ministry of Education and Science of Ukraine. A considerable part of the financial support required for the maintenance of the institution is provided to FTHC by the Ministry of Education of the mother-country, or is completed by means of application.

Partium Christian University

Type of programs and degrees

Bachelor's degree, Master's degree, Adult training and education

Short presentation

The Partium Christian University (PCU) is an integral part of the system of Transylvanian/Partium higher education in Hungarian language, the first independent, accredited university established, after the changes in 1989, by Hungarians living in Romania. Thirteen undergraduate courses and five graduate courses are operated by three faculties of the University (the Faculty of Humanities, the Faculty of Economics, and the Faculty of Arts). Since its foundation, the University met with recognition in the national higher education (university) system, and also established with Hungarian universities close and well-operating cooperation regulated by bilateral agreements.

Hungarian University of Transylvania

Type of programs and degrees

Bachelor's degree

Faculties, institutions

Faculty of Economics and Humanities (Miercurea Ciuc/Csíkszereda), Faculty of Engineering and Social Sciences (Miercurea Ciuc/Csíkszereda), Faculty of Engineering and Humanities (Targu Mures/Marosvásárhely), Faculty of Natural Sciences and Arts (Cluj-Napoca/Kolozsvár)

Short presentation

The Sapientia – Hungarian University of Transylvania (Sapientia HUT), one of the Romanian higher education institutions was founded in 2001. Its establishment was supported by the Hungarian state. The University is operating in three Transylvanian towns (Miercurea Ciuc/Csíkszereda, Targu Mures/Marosvásárhely, and Cluj-Napoca/Kolozsvár). The University provides, in the academic year of 2010/2011, courses in Hungarian in 22 programmes in the following disciplines of science: engineering, political sciences, social sciences, economics, humanities, and arts, under the direction of 260 domestic instructors/foreign guest professors.

Selye János University

Type of programs and degrees

Bachelor's degree, Master's degree, PhD programs, Adult training and education

Faculties, institutes

Faculty of Economics, Faculty of Teacher's Training, Faculty of Reformed Theology

Doctoral schools

Faculty of Teacher's Training: Hungarian language and literature; Faculty of Reformed Theology: theology

Short presentation

Selye János University being the youngest higher education institution of Slovakia is the only independent state-funded higher education institution in Slovakia providing courses in Hungarian. The main purpose of the University is to provide high-level training for primary and secondary school teachers, and theologians as well as training for professionals in the field of e.g. finance, IT, and marketing. Selye János University has a mission to provide education in a native language, and to ensure quality training for teachers and educators, theologians and economists working in nurseries, primary and secondary schools with instruction in Hungarian language.
