RESEARCH

UNIL pursues long-term fundamental research and is actively involved in the transfer of new knowledge to society and the economy.

Its ambition is to position itself at the highest national and international level not only in research, but also in the training of young scientists. It seeks to attract dynamic young researchers who will ask new, thought-provoking and difficult questions, allowing them to work productively sheltered from outside pressures in an environment respectful of the long timelines that research requires.

SOME FIELDS OF RESEARCH

Law and criminality

- Comparative law
- Criminal sciences

Business

- Commerce
- Finance
- Responsible management

Society

- Political sciences
- Public administration
- Social sciences
- Sport sciences

Environment

- Environmental sciences
- Geosciences
- Tourism

Human sciences

- Comic strips
- English literature
- Film
- Francophone literature
- Historical sciences of culture
- Religious studies

Life sciences

- Biology
- Medicine

The University of Lausanne, a key institution in the Swiss world of higher education and research, is home to around 14,000 students and 3,600 staff.

Its research activities focus on three main themes: human and social sciences, life sciences and medicine, and environmental sciences. UNIL lays great store by the quality and innovation of its teaching. This is characterised by a highly interdisciplinary approach which is even reflected in the organisation of its faculties.

The main UNIL campus is located on the banks of Lake Geneva. The closeness to the lake and mountains provides a delightful setting for study and research. To preserve this environment, the UNIL campus is managed according to principles of sustainable development.

The University of Lausanne is situated in the heart of French-speaking Switzerland, in the centre of Western Europe - close to France, Germany, Italy and Austria. It follows an active policy of collaboration at local and international level.
